DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement (IDS) submitted on 24 May 2005 has been acknowledged and placed in the file. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the examiner is considering the information disclosure statement.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Regarding claim 14, the word "means" is preceded by the word(s) "a storing" in an attempt to use a "means" clause to recite a claim element as a means for performing a specified function. However, since no function is specified by the word(s) preceding "means," it is impossible to determine the equivalents of the element, as required by 35 U.S.C. 112, sixth paragraph. See *Ex parte Klumb*, 159 USPQ 694 (Bd. App. 1967).

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 13-15 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claim 13i drawn to a computer program *per se*. Data structures not claimed as embodied in computer-readable medium are descriptive material *per se* and are not statutory because they are not capable of

causing functional change in the computer. See e.g., *In re Warmerdam*, 33 F.3d at 1361 USPQ2d at 1760. See MPEP § 2106.

Allowable Subject Matter

4. Claims 1-12 are allowed over the prior art of record.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references of Wada, Ishida disclose a method for supplying of fuel to a multi-cylinder internal combustion engine.
